[Question of Term Final Examination]

Khulna University

School: Law	Discipline: Law	Program: LL.B. (Hons.)
Year: First	Term: Second	Examination Year: 2025 Session: 2024 - 2025
Course Code: 061128 CSE 1251	Course Title: Basic Computer Skills	
Total Marks: 60	Time: 03 Hours	Credit: 3.0
Instructions:		

Part A

There are 04 questions in this section. Answer any 03 questions.

Sl. No	Question Description	Marks
1.	a) Distinguish between data and information with an example. b) Explain the basic organization of a computer system with proper diagram. c) Describe how the shift from fourth generation to fifth generation impacted the size, speed, and heat generation of computer systems.	03 04 03
2.	A law firm uses an automated software system that performs all calculations internally using binary arithmetic to manage compensation payouts for a class-action lawsuit. Suppose $(200)_8$ plaintiff groups have applied for compensation, and the court orders $(FA0)_{16}$ taka to be disbursed to each group. The system first converts all values into binary and performs all calculations in binary format. a) Calculate the total amount of compensation that needs to be granted by the firm. Show all necessary conversions and perform the calculation using binary multiplication. Finally, express the result in decimal. b) After the initial calculation, the court mandates a reduction in the total allocated budget by $(3B2)_{16}$ taka due to processing fees. Perform the subtraction using the 2's complement method.	05 05
3.	a) Explain the various types of processors used in computer systems. b) Describe how to insert animations and transitions in slides. c) Narrate the formula to calculate the total and average marks of students in cells C2:C20.	04 03 03
4.	a) Briefly describe the different types of ROM used in modern computing. b) Differentiate between compiler and interpreter. c) Write two major differences between application software and utility software.	05 03 02

Part B

There are 04 questions in this section. Answer any 03 questions.

Sl. No	Question Description	Marks
1.	a) Differentiate among LAN, MAN, and WAN with examples. b) Suppose a Corporate Law Firm plans to connect 40 computers inside their headquarters. Because they handle highly sensitive attorney-client data, they require a network layout that	05 05

	provides the highest level of redundancy, ensuring uninterrupted communication even if multiple cable connections fail. Which network topology would be most suitable for this scenario? Explain your reasoning.	
2.	a) What is data encryption? How does it help in protecting information? b) What is phishing? Explain how users can protect themselves from phishing attacks. c) Define malware. Describe different types of malwares with examples.	03 03 04
3.	a) What is virtual learning management system? How do platforms like Zoom or Google Classroom facilitate remote education and resource sharing for the students? b) Define cloud computing. Explain how it differs from local computing. c) Discuss the advantages and risks of storing data in the cloud.	03 03 04
4.	a) What is Cyber Ethics? Explain why maintaining a professional digital footprint and upholding cyber ethics is critical for legal practitioners. b) A new lawyer is working on a secret, multi-million-dollar business deal. To finish their work quickly, they use the free Wi-Fi at a coffee shop to open private legal documents. Later that day, they post a frustrated message on social media complaining about the lawyers on the other side of the deal. Identify and discuss the cyber ethics violations in this scenario and their potential legal/professional consequences.	04 06
